EXPERIENCE

Foqal

2023

Software Engineer Intern

- Collaborated on the redesign of the client portal using SCSS and Bootstrap to streamline navigation
- Debugged and configured Slate text editor to maintain proper formatting when handling lengthy text inputs
- Replaced inline styles with class-based styling to eliminate Content Security Policy violations
- Led a training initiative on React's useRef hook to familiarize the team with a new codebase
- Engaged in Agile/Scrum workflow with sprints, planning poker, daily stand-ups, and retrospectives

Alchemy Systems

2022-2023

Frontend Developer

- Designed and translated wireframes into functional interfaces, prioritizing usability and accessibility
- Optimized applications for cross-browser compatibility, ensuring a reliable and consistent user experience
- Utilized Chrome DevTools to debug elements and identify opportunities for performance improvements

NK Agency

2021-2022

Marketing Manager

- Developed and executed campaign strategies in collaboration with stakeholders and cross-functional teams
- Created interactive digital assets and mobilized strategic partnerships to elevate client's online visibility
- Utilized social media analytics tools and paid media to reach target audiences and generate sales

PROJECTS

Online dating and geosocial networking application.

- Engineered a backend solution featuring a RESTful API, authentication, and AWS S3 for image storage
- Utilized a geocoding API to provide location-based matching and facilitate face-to-face interaction
- Implemented server-side validation using JSON Schema to ensure data integrity and enable seamless client-side error handling

Employment marketplace for job seekers and employers.

- Accelerated the development process with Tailwind CSS to quickly build modern and consistent interfaces
- Deployed a loading spinner component to expedite the First Contentful Paint and maximize user engagement
- Introduced live search with Lodash debounce for a more responsive and efficient search experience
